Empathy Map Canvas

An empathy map serves as a clear, intuitive framework designed to synthesize key insights regarding a user's habits, perspectives, and emotional responses.

It acts as an essential diagnostic instrument that empowers project teams to gain deeper alignment with their target audience.

Developing a truly impactful system hinges on accurately identifying the underlying challenge and deeply connecting with the individual who encounters it daily.

Needs more accessible station layouts
Finds peak hour crowding extremely stressful
Desires better feedback on travel times
Wants simplified multi-modal payment options
Believes automated routing could be improved
Think & Feel
Crowds wearing headphones & using power banks
Visual alerts of train delays on digital boards
See
Integrated city app with real-time transit data map
Minimalist, clear station numbering system
Announcements about maintenance on multiple lines
Commuters sharing tips about optimal standing positions
Hear
Audio cues for accessible entrance locations
Public focus groups about next-gen metro features
Say & Do
Requests alternative routes on the city app
Frequently uses digital wallet for fast entry
Advocates for more eco-friendly transit policies
Plans travel in advance using integrated maps
Usually prefers pre-booking to reduce counter-time
Javier
Pain
Excessive ticket line wait times
Confusing paper map details
Peak hour crowd management issues
Minimal seating options at platforms
Gain
Seamless multi-modal integration
Instant electronic journey validation
Accessible, high-accuracy fare calculators
Digital-first customer support options
